

Emission Certificates and Carbon Offsets

An Equitable And Market-Based Approach To Climate Change And Sustainable Development

Whether you want to fulfill corporate greenhouse gas reduction targets, gain carbon market experience, prepare for potential regulatory requirements, enhance your brand image, attract new investors or deliver on your Corporate Social Responsibility (CSR), Cargill will help your organization achieve its goals.

Customers

Cargill serves all types of customers who want to lead the fight against climate change and contribute to sustainable development:

- Companies under mandatory caps
- Companies with voluntary offsetting targets
- Companies with social investment strategies

Products

Our large diversified global presence and portfolio of quality carbon offsets allows us to offer our customers a wide range of solutions to offset their carbon emissions:

- Certified Emission Reductions (CERs) and Emission Reduction Units (ERUs) from Clean Development Mechanism/Joint Implementation (CDM/JI) projects
- Voluntary Emission Reductions (VERs) like Voluntary Carbon Standard (VCS), VER+ and Gold Standard
- Assigned Amount Units (AAUs)

Services

Cargill's comprehensive portfolio of services makes it easy to manage both information and risk more effectively:

- Financial support to carbon reduction projects at all stages
- Carbon portfolio creation and risk management
- Trading of emission reductions in the international market

Emission Certificates and Carbon Offsets

A Global Partner To Help Solve A Global Issue

Cargill is directly involved in the effort to improve energy efficiency, increase use of renewable energy and reduce greenhouse gas intensity globally. We partner with companies aspiring to make a difference in the world by limiting their carbon footprint, offsetting their emissions and contributing to sustainable development.

An Invested Partner For Sustainable Development

Cargill is a member of the Chicago Climate Exchange (CCX®), the world's first and North America's only voluntary, legally binding greenhouse gas emission reduction program. In March 2007, Cargill committed to achieve a six percent reduction in greenhouse gas emissions by 2010. Cargill has become a leading investor in offsetting projects in developing countries — thus committing itself to the economic and social development of communities where it is needed the most.

Deeper Insight, Improved Decisions

Our partners have access to a team of experienced carbon investment and trading portfolio managers. Cargill will give you the power to make the world's environment cleaner and achieve your sustainability objectives — while at the same time delivering good financial returns.

A Diversified Carbon Portfolio

Cargill, through its wholly owned subsidiary Green Hercules Trading Limited (GHT), has built a diversified carbon portfolio that encompasses projects in a variety of sectors (e.g. hydro, wind, biomass power, etc.) across countries like Mexico, Kenya, Pakistan, India and China. Our progressive strategies ensure investment in projects that have a positive impact on local communities.
