

Trace Mineral Salt with EDDI

Champions Choice® Trace Mineral Salt with EDDI is specially formulated to meet the salt and trace element requirements of most livestock, while supplying the highest allowable level of iodine in the form of Ethylenediamine Dihydriodide (EDDI). EDDI helps to control body cell metabolism organically, and also assists in improving feed utilization, promoting growth and optimizing reproduction. Trace minerals supplement the diet to promote digestion, growth, maintenance of body tissues, proper reproductive processes, and general well being. Blocks are weather-resistant for free-choice feeding.

No salt has better bloodlines.™
