

Cargill® Sea Salt

collaborate > create > succeed™

Put the power of the living sea into your products.

A Big Sea of Opportunity

Consumers searching for unique flavors and enhanced tastes are turning to sea salt as a solution. Retail sea salt sales volume **is increasing** within a declining total retail table salt category¹. Over 80% of home meal preparers are aware of sea salt and almost half are using sea salt in their home cooking.²

Consumers are “catching the sea salt wave” and carrying the trend over to the food products they desire. Consumers are showing a preference towards choosing a food product with sea salt; 4 of 5 home meal preparers would be “very likely” or “somewhat likely” to purchase a food product with sea salt rather than the same product with regular salt.² Sea salt is a major food trend, not a fad.

Cargill – Your Sea Salt Partner

For over 10 years, Cargill has been the leading supplier of sea salt to the food processing industry. From crackers to soup, our growing portfolio of food grade sea salts is designed to meet your manufacturing needs. Cargill also makes natural sea salts without any anti-caking or free flow additives or conditioners that may be used in your natural products. Please contact your Cargill sales representative for more information.

From ideation to launch, Cargill has the knowledge, capabilities and ingredients you need to develop products that delight your consumers.

Sea Salt

Purified Sea Salt

A food grade, granular, white crystalline sea salt made by evaporating the brine made from sea salt harvested from the Pacific Ocean. It is intended for general table and cooking use, as well as direct application in foods manufactured by the various food processing industries. Also available iodized. Contains magnesium carbonate to improve caking resistance and flowability.

Purified Sea Salt with YPS

A food grade, granular, white crystalline sea salt made by evaporating the brine made from sea salt harvested from the Pacific Ocean. It is intended for a variety of end-use applications, particularly for use in dry salt dispensing and brining applications. Food uses include, baking, cheese manufacturing and meat processing. Contains Yellow Prussiate of Soda (YPS) to improve caking resistance.

Purified Sea Salt Untreated

A food grade, granular, white crystalline sea salt made by evaporating the brine made from sea salt harvested from the Pacific Ocean. This product contains less than 50 ppm of calcium and magnesium. Food uses include the manufacturing of mayonnaise, salad dressing, margarine, conventional churn butter, canning delicate vegetables such as peas, lima beans, and tomatoes, and canning high acid and pickled vegetables. Contains no anticaking or free flowing additives or conditioners.

Purified Sea Salt Fine

An extra fine screened food-grade sea salt harvested from the Pacific Ocean. It is recommended for use in products requiring a very fine crystal size for uniform blending. It is ideal for use in dry soup, cereal, flour and spice mixes, as well as for topping snack foods. Contains Tricalcium Phosphate (TCP) to improve caking resistance.

Purified Sea Salt Powder

A food-grade, pulverized, white crystalline sea salt harvested from the Pacific Ocean. It is recommended for use in products requiring extremely fine sizing for blending. It is also ideal for use in dry soup, cereal, flour and spice mixes, as well as for topping snack foods. Contains Tricalcium Phosphate (TCP) to improve caking resistance.

Sea Salt Grinder

A food grade, tightly screened sea salt harvested from the Pacific Ocean. It is made by channeling ocean water into ponds and allowing the sun and wind to evaporate it naturally. It is intended for gourmet use and particularly suited for use in salt mills and seasoning blends. Contains no anticaking or free-flowing additives or conditioners.

Sea Salt Extra Coarse Topping

A food grade, tightly screened sea salt harvested from the Pacific Ocean. It is made by channeling ocean water into ponds and allowing the sun and wind to evaporate it naturally. It is intended for a variety of food processing applications that are not sensitive to minor inclusions of calcium and magnesium. Contains no anticaking or free-flowing additives or conditioners.

Sea Salt Topping

A food grade, fine-screened sea salt harvested from the Pacific Ocean. It is made by channeling ocean water into ponds and allowing the sun and wind to evaporate it naturally. It is intended for a variety of food processing applications including topping pretzels, crackers and wafers and processing tomato products. Contains no anticaking or free-flowing additives or conditioners.
