TRANSLUCENT HYDRATING TONER
with Floraesters K-20W® Jojoba

This translucent, alcohol-free toner revitalizes and balances the skin. In this toner Floraesters K-20W Jojoba hydrates and firms the skin, leaving the face feeling clean, revitalized, and moisturized.

This image shows a close-up of skin, highlighting the hydrating effect of the toner.

CHARACTERISTICS

- **pH:** 5 - 6

PROCESS

1. Add the Versene Na2 Crystals Chelating Agent to the deionized water of Phase A with moderate propeller agitation at 40-45°C. Mix until completely dissolved. Maintain the temperature at 40-45°C.
2. In a separate container, combine the Floraesters K-20W Jojoba, Glycerine 99.7% USP Kosher, Butylene Glycol, and fragrance of Phase B at 40-45°C with low to moderate propeller agitation. Make sure the Floraesters K-20W Jojoba is completely dissolved. Add Sepinov EMT 10 and continue mixing with low to moderate propeller agitation until the Phase becomes a uniform, low viscosity gel. Maintain the temperature at 40-45°C.
3. Add Phase A to Phase B very slowly with rapid propeller agitation at 40-45°C. Begin cooling to room temperature once the mixture becomes uniform.
4. Add Phase C to Phase AB, one ingredient at a time in the order listed, at room temperature with moderate to rapid propeller agitation. Make sure each ingredient is uniformly mixed in the solution before the next ingredient is added.
5. Add Phase D with moderate to rapid propeller agitation to achieve pH 5.5.

**Phase** | **Trade Name** | **INCI** | **Supplier** | **% WT**
---|---|---|---|---
A | Deionized Water | Water | - - - - - q.s.
