## Technical Information

### Description

These products are acceptable for regeneration of water softener ion exchange resins and conforms to the requirements of NSF/ANSI/CAN Standard 60 - Drinking Water Treatment Chemicals – Health Effects and also meets the AWWA Standard for Sodium Chloride B-200. These products are intended for use in both household and commercial water softeners and can be utilized effectively in most water softening units. These products contain no known allergens and exhibit virtually no microbiological activity.

### Additives

Diamond Crystal® Supersoft® Salt Crystals may Sodium Hexametaphosphate (SHMP) which improves resistance to mushing and bridging. SHMP is GRAS (generally recognized as safe) by the US Food and Drug Administration.

### Chemical Analysis

Component	Units	Typical	Specification
Sodium Chloride (dry)	%	99.8	99.6 min.
Water Insolubles	ppm	5	

### Methods of Analysis

Methods of analysis are based on ASTM E 534, AWWA B 200, and Cargill internal methods.

### Producing Locations

This product is manufactured and packaged at Cargill Salt, Hersey, MI. Product of the USA.
