Acme Plasticizer

DESCRIPTION
Acme Plasticizer is designed to make better, more uniform quality concrete block, pipe, etc.

BENEFITS
- Improves green strength
- Reduces machine wear
- Gives better surface texture
- Reduces absorption
- Eliminates the fine cracks
- Reduces culls and breakage in handling

HOW TO USE
Acme Plasticizer should be diluted with ten parts of water. This diluted liquid plasticizer may then be dispensed to the mixer through automatic dispensing equipment at the rate of 3 to 4 ounces for each bag of cement in the batch. If there is a preference not to dilute with water, then a one-quarter to one-half ounce of Acme Plasticizer to each bag of cement may be dispersed directly to the batch.

PHYSICAL FORM
Straw to amber liquid
- uniform consistency
- rust inhibited
- freeze-thaw stable

SHIPPING CONTAINER
55 gallon drum, 330 gallon totes

COMPANION PRODUCTS
Water Repellents, Rack Coating, Form Release Agents, Accelerators
