California Proposition 65

All Products

Thank you for your inquiry regarding California's Proposition 65 ("Prop 65") as it relates to the products sold by Cargill to the USA.

Prop 65 generally requires that businesses notify Californians about the presence of certain chemicals in the products they purchase. California has published a list of more than 900 chemicals covered by Prop 65, including lead, cadmium and other contaminants that may be naturally occurring in the environment. Businesses are required to provide a "clear and reasonable" warning before knowingly and intentionally exposing a Californian to a Prop 65 listed chemical if the exposure to the average consumer of the product exceeds very low threshold levels for such portion of the chemical that cannot be shown to be "naturally occurring." Prop 65 may require a warning even if the product is fully in compliance with federal food safety requirements.

Cargill guarantees that the Products will meet agreed Product specifications and that the Products which are sold directly by Cargill to USA destination* will comply with and will not be adulterated or misbranded under the US Federal Food, Drug, and Cosmetic Act, as amended. Because the usage rates and consumer consumption levels of finished products(s) that you manufacture will vary and are not known to Cargill, we do not, and cannot, guarantee that the product(s) that you manufacture using the Products will not require a Prop 65 warning.

*Cargill cannot confirm FDA compliance for products or product ingredients not directly supplied by Cargill to the USA.

***Claims**: The labeling, substantiation and decision making of all claims for your products is your responsibility. We recommend you consult regulatory and legal advisors familiar with all applicable laws, rules and regulations prior to making labeling and claims decisions.*
