Product Description

Driller's Choice® Granulated Salt
This material is a granular, white crystalline sodium chloride manufactured under stringent process control procedures.

Driller's Choice® Fine Rock Salt
This material is a fine screened, translucent to white crystalline solid obtained from underground domal salt deposits in Louisiana by physical mining. The salt is exploited by drilling and blasting with explosives in a manner similar to that used in other types of mineral mining. The mined salt is then crushed, screened and hoisted to the surface where it is treated with an anticaking agent and packaged for distribution.

These materials contain water-soluble Yellow Prussiate of Soda, which is added to improve caking resistance in accord with 21CFR 573.1020.

Product Application

These materials are intended for use as a weighting agent in drilling fluids, and in workover and completion fluids. Drilling fluids, when fully saturated with salt, will not be absorbed into or dissolve underground salt deposits during drilling.

Storage and Shelf Life

Salt products do not have a shelf life in the traditional sense. Salt will not spoil or support pathogenic growth. Please see the following information regarding Shelf Life, Caking Resistance, and Storage conditions:

Shelf Life: Indefinite

Caking Resistance: Caking resistance varies depending on the crystal size, additives and storage conditions. End use application should be taken into consideration when determining acceptable product life in regards to caking resistance. Cargill® Driller’s Choice® Salt has an estimated caking resistance of 9-12 months.

Storage Conditions: To improve caking resistance, product should be stored in a dry, covered area at humidity below 75%.

Why Cargill?

- Salt products are an integral part of Cargill – one of the world’s largest food ingredient providers and a recognized leader in the food processing industry.
- Our products go well beyond standard and high purity salt: Our Alberger® brand, Microsized®, Premier™, CMF®, sea salts, and our sodium reduction solutions such as Potassium Pro® and FlakeSelect®, make up the most extensive product line in the Industry.
- All products are produced under HACCP manufacturing practices and audited by a third party food safety firm.
- We offer full EDI capabilities for customers who need to exchange information via Electronic Data Interchange and the only online ordering portal in the industry, www.cargillsaltstore.com.
- Cargill’s nationwide distribution capabilities, combined with the best logistics and customer service specialists in the business, ensure that you get the right salt at the right time.
