

Technical Data Sheet

NatureWax® Elite 211

PRODUCT DESCRIPTION

A proprietary blend of hydrogenated vegetable glycerides derived from sunflower and palm with non-hazardous additives.

APPLICATION

Vegetable-based wax blend developed primarily for use in container candles with high fragrance loading, where it offers a robust blend for one-pour, full pull away and superior fat bloom resistance. Also suitable as a softener for pillar candles.

Other uses: paper cup coatings, stationery pencils, color pencils, ink ribbons, mold lubricant, textile finishes, sizing, cord lubricant, metal lubricant, adhesives, thermoplastics resin additive, leather dressing and crayons.

BIO-ENGINEERED STATUS

NatureWax® Elite 211 is produced from sunflower seed and palm oil. There are no commercially available varieties of sunflower seeds that have been 'genetically modified' (GM) via recombinant DNA. There are also no commercially available varieties of palm that have been genetically modified via recombinant DNA. Analysis on the presence of genetic material (DNA), modified or not, gave a non-detectable result in the final product. Qualitative Polymerase Chain Reaction (PCR) is the analytical technique used to determine the presence of trace amounts of DNA. Further information is available on request.

NatureWax® Elite 211

PACKAGING & CODING

Lot Code Format

The Lot Code is a unique number generated by our sales order system. From this unique number, we are able to trace back through our processing steps within our Quality Control System to the source oil(s).

SHELF LIFE, SHIPPING & STORAGE INFORMATION

Product Shelf Life

18 months from Date of Pack. Testing toward end of anticipated shelf-life may suggest that shelf-life may be extended. Please request assistance if this is required.

Shipping & Storage Conditions

For ease when using, store at 18-30°C. Protect from extreme heat and cold (temperatures over 32°C and under 5°C).
