

## A New Source of Omega-3

Latitude™ is a plant-based, sustainable, alternative source of Omega-3 that can help to ensure a predictable supply and price of this key ingredient. Omega-3 fat components such as EPA, DPA and DHA in Latitude™ are identical to those in fish oil. Latitude™ is an oil with Omega-3 that can be incorporated into aquafeed without changing Omega-3 feed requirements or manufacturing processes. Tests have shown that 100% of fish oil can be replaced with Latitude™ in commercial salmon feed with no effect on the performance of the fish<sup>[1]</sup>. Latitude™ can enhance your possibilities by making your margins more predictable in a time when there is increasing pressure on fish oil availability and growing consumer demand for Omega-3.

- Predictable Supply
- Predictable Price
- Reduced Risk

**Contact us to explore using Latitude™ Omega-3 and to request samples for testing.**
