

Driller's Choice® Granulated Salt

Product Description

Driller's Choice® Granulated Salt

This material is a granular, white crystalline sodium chloride manufactured under stringent process control procedures.

This material contains water-soluble Yellow Prussiate of Soda, which is added to improve caking resistance.

Product Application

This product is intended for use as a weighting agent in drilling fluids, and in workover and completion fluids. Drilling fluids, when fully saturated with salt, will not be absorbed into or dissolve underground salt deposits during drilling. This product is specially sized for oilfield and oil well drilling applications where a quick dissolving salt is required.

This product is not approved for human or animal consumption and is intended for use only in chemical or industrial applications.

Caking Resistance

Caking Resistance: Caking resistance varies depending on the crystal size, additives and storage conditions. End use application should be taken into consideration when determining acceptable product life in regards to caking resistance. Cargill® Driller's Choice® Salt has an estimated caking resistance of 9-12 months.

Methods of Analysis

Methods of analysis are based on ASTM E 534 and Cargill internal methods.

Producing Locations

This product is packaged at Cargill Salt Breaux Bridge, LA. Product of USA.

Physical Information

Driller's Choice® Granulated Salt

PHYSICAL	TYPICAL
NaCl (%)	99.8
Water Insolubles (ppm)	20
Surface Moisture (%)	0.03
YPS (ppm)	5
Bulk Density (g/l)	1280
Bulk Density (#cu/ft)	80

PERCENT PARTICLE SIZE DISTRIBUTION (SCREENS)	OPENING INCHES	OPENING MICRONS	% RETAINED TYPICAL
