

Driller's Choice® Fine Untreated Salt

Product Description

Driller's Choice® Fine Untreated Salt

This material is a fine screened, translucent to white crystalline solid obtained by solar evaporation.

This material contains no anticaking or free-flowing agents or conditioners.

Product Application

This product is intended for use as a weighting agent in drilling fluids, and in workover and completion fluids. Drilling fluids, when fully saturated with salt, will not be absorbed into or dissolve underground salt deposits during drilling. This product is specially screened for oilfield and oil well drilling applications where a quick dissolving salt is required.

This product is not approved for human or animal consumption and is intended for use only in chemical or industrial applications.

Caking Resistance

Caking Resistance: Caking resistance varies depending on the crystal size, additives and storage conditions. End use application should be taken into consideration when determining acceptable product life in regards to caking resistance. Cargill® Driller's Choice® Fine Untreated Salt has an estimated caking resistance of 3-6 months.

Methods of Analysis

Methods of analysis are based on ASTM E 534 and Cargill internal methods.

Producing Locations

This product is packaged at Cargill Salt White Marsh, MD. Product of Bonaire, Caribbean Netherlands, and Mexico.

Physical Information

Driller's Choice® Fine Untreated Salt

PHYSICAL	TYPICAL
