Brine Bits® Water Softening Salt

Product Description and Application

Brine Bits® Water Softening Salt
This product is acceptable for regeneration of water softener ion exchange resins and conforms to the requirements of NSF/ANSI/CAN Standard 60 - Drinking Water Treatment Chemicals – Health Effects and also meets the AWWA Standard for Sodium Chloride B-200.

This product is intended for use in commercial water softeners. Under normal conditions, the specific size, shape and density of this product resists mushing, bridging, and channeling to provide excellent percolation and brine formation. This product is virtually 100% soluble, contain no known allergens and exhibit no microbiological activity.

Additives
Brine Bits® may contain Sodium Hexametaphosphate (SHMP), which improves resistance to mushing and bridging. SHMP is generally recognized as safe (GRAS) by US Food and Drug Administration.

Methods of Analysis
Methods of analysis are based on ASTM E 534, AWWA B 200, and Cargill internal methods.

Producing Locations
This product is produced at Cargill Salt Akron, OH. Product of the USA.

Why Cargill?
• Salt products are an integral part of Cargill – one of the world’s largest food ingredient providers and a recognized leader in the food processing industry.
• Our products go well beyond standard and high purity salt: Our Alberger® brand, Microsized®, Premier™, CMF®, sea salts, and our sodium reduction solutions such as Potassium Pro® and FlakeSelect®, make up the most extensive product line in the Industry.
• We offer full EDI capabilities for customers who need to exchange information via Electronic Data Interchange and the only online ordering portal in the industry, www.cargillsaltstore.com.
• Cargill’s nationwide distribution capabilities, combined with the best logistics and customer service specialists in the business, ensure that you get the right salt at the right time.
