 Re: Turkey Product Satisfaction Information

Dear Valued Customer

Thank you for requesting general information regarding product satisfaction initiatives at Cargill Meat Solutions Corporation, dba Cargill Protein (hereinafter “Cargill”) turkey products. For purposes of calculating age of a particular poultry product, consider day zero as the date of production/pack. The dates contained here are recommendations only considering all proper cold chain and product handling is followed by customers and/or consumers once product leaves Cargill’s control. This is not a shelf life guarantee; stated shelf life guarantees shall be clearly displayed on the product and/or box label.

Product Satisfaction Information

Frozen Turkey	Months / Days
Boneless Turkey Meat – Frozen	12 Months / 365 Days
Boneless Turkey Breast Meat – Frozen	18 Months / 547 Days

Turkey Variety Meats – Frozen	12 Months / 365 Days
Fresh Turkey	Months / Days
Ground Turkey – Fresh	7 days – unless otherwise stated on the product label
Bone-in Turkey Meat – Fresh	7 days – unless otherwise stated on the product label
Boneless Turkey Meat – Fresh	7 days – unless otherwise stated on the product label

Our production code dating system on external product packaging consists of the production pack date, with the exception of whole birds that have a Kill Date or Julian Date. Examples of lot codes are below

- Example 1: Packed on Apr 24, 2012
- Example 2: Packed Date 08/27/2020
- Whole Bird Example: Kill Date 08/27/2020
- Frozen bird example: 288122021382 [288=Julian Date, 1=Last digit of current year, 2=plant code 20=boxing station, 21382=Sequential number unique for every box]

Proper product handling and cold chain management begins with us, the manufacturer. You and your customers also play key roles in maintaining the chain of product freshness and shelf life. Maintaining product quality requires **time** and **temperature** management. Keeping poultry **consistently cold** and **in the proper packaging** are also key to maintaining optimal quality and freshness. Temperature control devices are designed to maintain product temperatures, fresh product should always be maintained below 40°F, and frozen product should be at or below 0°F (-17.4°C).

Stated package dating overrides any guidelines stated by this letter. Additionally, product guarantees are not valid when the product is handled and/or stored outside the intended recommendations. Cargill reserves the right to review all refrigeration and product rotation records prior to settling any claims which might result from the stated
