Lower costs and a safer work environment. Anova® gets you there.

Cargill Anova® Warm Mix Additive
Improved compaction at the lowest cost in use.

With Cargill’s non-toxic Anova Warm Mix Additive, crews can reliably achieve density and improve workability at lower temperatures while reducing emissions and odor.

The unique performance of our liquid Warm Mix Additive are backed by more than 60 years of technical expertise in bio-based chemistry.

**Improving performance**
- Reliably achieve density and improve workability
- Increase haul distance and production windows
- Eliminate the need for adhesion promoters

**Creating economic value**
- Lowest cost in use
- Lower plant costs due to reduced fuel usage at lower production temperatures
- Liquid product for simple implementation
- Enhances opportunity for compaction or density bonuses

**Reducing environmental impact**
- Non-hazardous, non-toxic, low odor
- Made from bio-based chemistries
- Reduce HMA plant emissions
- Reduce fume exposure to work crews during placement

**Enriching communities**
- Innovative technologies can enable efficient infrastructure investments
- Renewable raw materials help support farmer livelihood, rural communities and agriculture industry growth
- Working with farmers, government, industry groups, customers and consumers to make the future of industrial solutions more sustainable
Cargill Anova can enable reliable production of a balanced mix, regardless of the performance specification. Using any test method selected by the industry, the performance of Cargill’s Warm Mix Additive will be confirmed.

To demonstrate this performance, Cargill has performed several of these tests in their asphalt application lab. Anova WMA improves the moisture resistance of the asphalt binder when producing asphalt at a lower temperature. Compared to conventional Hot Mix Asphalt, Anova Warm Mix Additive also shows better rutting resistance and allows you to achieve better compaction at a lower temperature compared to conventional Hot Mix Asphalt.

Listed above is a selection of the products we have to offer. Talk to us to find out which product will help you solve any challenges you may be facing.
Proven performance.
The Cargill way.

A partnership with Cargill provides your business an undeniable advantage. We offer you a proven record of support from our state-of-the-art asphalt applications lab. Cargill’s unique support system starts with materials evaluation, trial assistance, plant implementation and integration and continues through quality assurance and ongoing support, meaning you can count on us to provide the expertise and chemistries required to meet your toughest challenges.
