

Actigum™ VSX 20

The performant biopolymer that brings viscosity, suspension and sensoriality to complex formulas

**DERIVED NATURAL
ACCORDING TO
ISO 16128**

**COSMOS
APPROVED**

**READILY
BIODEGRADABLE
ACCORDING TO
OECD 301 B¹**

HALAL

KOSHER

VEGAN SUITABLE²

MADE IN FRANCE

Origin:

- INCI: Sclerotium Gum (& Xanthan Gum)
- Biopolymer obtained through a process of aerobic fermentation of sugars with strains of Non-GMO *Sclerotium rofsii* and *Xanthomonas campestris*.
- Sources in the fermentation broth are of 100% vegetable origin: wheat & sugar beet.

Uniqueness:

- Synergy Scleroglucan & Xanthan gum
- Highly efficient thickener
- Performant suspending agent ($\geq 0.3\%$ dose)
- Emulsion stabilization aid
- Sensory enhancer aid
- Sprayable properties

Technical data:

- Dose of use 0.1-2%
- Powder form
- Slightly anionic
- Cold/Hot processable
- Cold soluble
- Compatibility: electrolytes, surfactants, alcohol, preservatives

Compatibility:

NaCl %	0	2
	+	+

Alcohol %	0	10	30
	+	+	+

pH	3	7	12
	+	+	+

With most preservative systems

Applications

Actigum™
VSX 20

When to use Actigum™ VSX 20?

- In formulations to increase viscosity and improve sensoriality at the same time
- In challenging formulations which contain high electrolytes, actives and/or alcohol concentration
- In challenging formulations that require a broad pH stability from low to high pH
- In formulations that require to suspend particles (exfoliating or decorative beads, pigments...)
- In sprayable formulations

Formulation tips

- Recommended equipment for cold or hot process:
 - Silverson® L5M-A : 8 000 rpm ≈ 5 min at room temperature
 - Ultra Turrax® T25 : 12,000 rpm, 15 - 20 min at room temperature
- Equipment only adapted for hot process :
 - VMI Turbotest® with dissolver (deflocculator) or Roto Stator: 1500 rpm, 30 min at 75°C
- Not adapted : any type of propeller, simple mixing
- The proportion of the rotor-stator and the vessel size impact the final result
- It is important to adapt the quantity of formula to the beaker
- Heating does not affect the final viscosity
- Cold process is possible and heating (75°C) will only make faster the deployment of the polymer
- Viscosity remains the same regardless the production process: batch to batch or semi continuous system from stock solution
- Batch size does not impact the viscosity during industrial scale-up
- Viscosity results in formulations predict the result in scale-up

Textures:

- Serum
- Gel
- Gel-cream
- Lotion
- BB cream
- Mask

Sensorial fingerprint:
very pleasant, shiny,
smooth, slightly fresh
and light body

Product details

- CAS N° Sclerotium gum 39464-87-4 Xanthan gum 11138-66-2
- Packaging: 25 kg (net) PE bags hermetically sealed
- Shelf life after production date (months): 24
- IECIC listed
