The nature derived scrubbing beads

Origin:
• INCI: Jojoba Esters
• Jojoba (*Simmondsia chinensis*)
• Jojoba esters originate from jojoba, a plant native to the Sonoran Desert

Traceability:
• The jojoba plant requires very little water and can be grown on land that is often unsuitable for other types of crops
• Mainly sourced from Chile, Israel, Peru and the United States

Uniqueness:
• Hard, smooth botanically derived microspheres of jojoba esters
• Gentler choice over other natural exfoliants, such as crushed fruit pits, shells or similar damaging materials
• Available in multiple particle size ranges in many standard colors

Technical data:
• Hard microspheres

Standard Sizes:

<tbody>
<tr>
<td>Formulation tips</td>
<td>Some pigments used in Florabeads® standard colors may be unstable in low pH systems or when exposed to concentrated chemicals such as acids, alkali, and surfactants.</td>
<td>Cargill Beauty recommends that all formulas are tested for color stability.</td>
