

Sustainably sourced corn and wheat

Meeting consumer demand and supporting customers' sustainability targets

Consumers are increasingly conscious about what they buy, wanting to know exactly where their purchases come from and how they are made. With these insights, the well-informed consumer is more likely to choose products that support sustainability throughout the supply chain.

At Cargill, we are working to nourish the world in a safe, responsible and sustainable way and drive positive change across our supply chains. This includes creating a more sustainable crop supply for our ingredients and applications.

We source certified corn and wheat, benchmarked at Silver level according to the Farm Sustainability Assessment. This industry-recognized benchmark system supports good agricultural practices in key sustainability areas, including:

Soil conservation

Biodiversity conservation

Water quality

Water use

* Benchmarked at Silver level against the Farm Sustainability Assessment. FSA is a standardized reference developed by SAI Platform, a food-industry organization dedicated to advancing sustainable agriculture in the food chain. It's designed to help producers assess their sustainable practices and support manufacturers in sourcing sustainably grown products.

To reach the Silver benchmark, farmers are independently audited based on standards that go further than European regulations and allow for credible sustainability claims.

Cargill products

Cargill offers sustainably sourced corn and wheat through a European mass balance system across the ingredient portfolio derived from corn and wheat:

 FOOD & BEVERAGE	 PAPER & PACKAGING	 FERMENTATION	 PHARMA	 ANIMAL NUTRITION
Starches Glucose syrups Glucose-fructose syrups Polyols Alcohol Wheat proteins	Native starches Modified starches Cationic starches Dextrin	Native starches Modified starches Dextrose Glucose syrup Sorbitol	Ethanol	Vital wheat gluten Corn gluten meal Glucose Syrup Dry and wet feed Dextrose

Cargill's offer includes:

- Silver benchmark proving sustainable sourcing
- Independently audited mass balance system

Cargill's sustainably sourced corn and wheat supports customers' sustainability commitments and provides assurance to consumers increasingly seeking sustainably sourced products.

The Cargill Advantage

As a global ingredient leader, Cargill's diverse portfolio is backed by world-class formulation expertise and supply chain reliability to help food and beverage manufacturers meet the most challenging application goals and marketplace demands.
