CargillTM

Wax That Works Wonders

As experts in the wax industry for over 25 years, Cargill is dedicated to bringing innovative, plant-based products to partners and homes across the globe. When we invented the first easy-to-use soy wax, we knew we were onto something good. Today we're proud to showcase that thoughtful agriculture can serve both businesses and homes around the world with high-performing products.

We supply to some of the most well-known brands in the world. With Cargill NatureWax, you get the finest wax derived from renewable, plant-based sources, deep technical expertise and an industry-leading portfolio of product solutions.

Rooted in Nature. Refined by Craft. Proven to Perform.

NatureWax candle wax offers superior performance from pour to trim. So you start with a more sustainable product* that burns clean from first light to final flicker.

Plant-Based Ingredients

Our proprietary waxes are developed from plant-based feedstocks instead of petroleum-based sources, providing a high quality wax derived from renewable materials.

A Better Burn

Waxes crafted with intention. Our exclusive low nickel technology provides long, consistent burn times for a reliable performance with every light.

Exceptional Scent Throw

Specifically formulated to provide superior hot and cold scent throw, NatureWax products are designed to let fragrances and aromas shine through and bring spaces to life.

Easy To Use

Designed specially for easy manufacturing, blending, and mixing with other ingredients to achieve the perfect candle for any occasion.

Broad Product Portfolio

We offer one of the largest plant-based wax portfolios in the industry. With unique access to feedstocks from around the globe, NatureWax offers a wide range of products from base waxes meant to be easily blended with paraffin wax to fully formulated, ready to pour waxes. We've got a vegetable wax for every candlemaker and every application.

Smooth, Elegant Appearance

NatureWax products are designed to give a smooth and elegant appearance with excellent toleration to crystallization and fat bloom resistance for premium performance burn after burn.

*Compared to paraffin wax

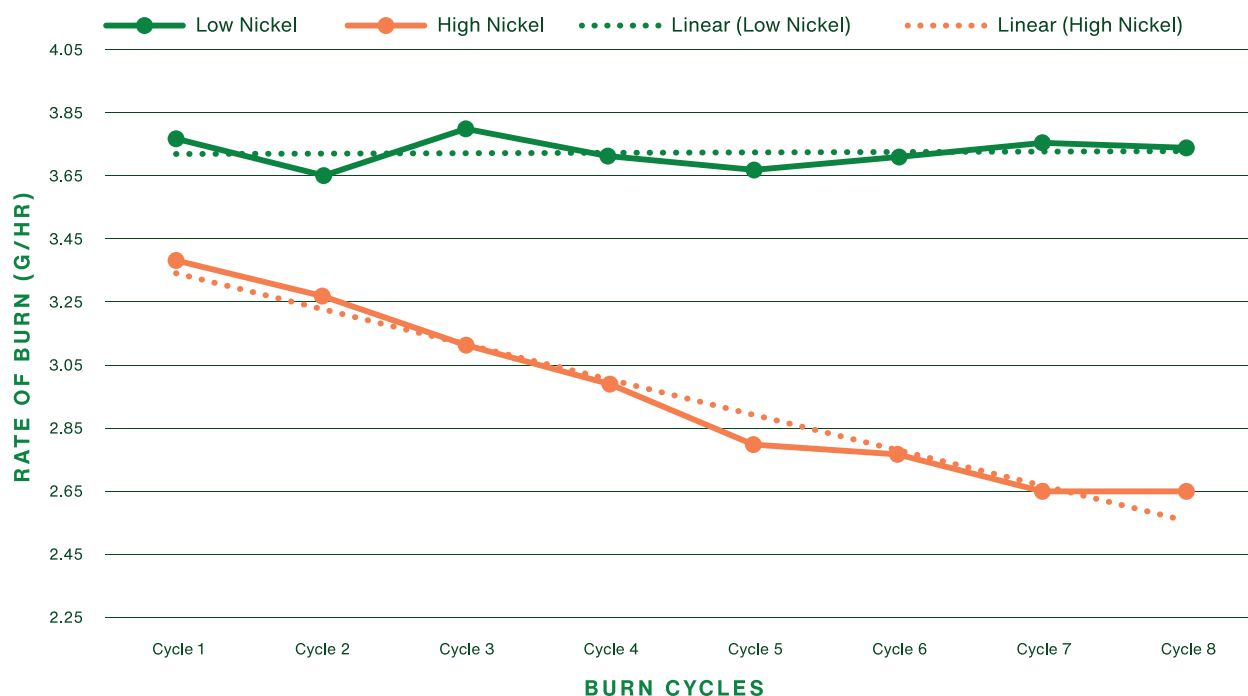

NatureWax Candle Wax's Patented Low Nickel Technology

A formula you can't copy. Performance you won't forget.

As innovators in plant-based waxes, NatureWax has an exclusive patent* on the development and use of waxes that have low levels of nickel (under 0.5 ppm), which is used in every product in our portfolio. Having low levels of nickel in wax has huge advantages when it comes to burn time and burn consistency, helping create a premium, high performing candle. Our low nickel patent helps candle manufacturers and candle users in several ways:

- 1** Creates a stable, consistent flame height that burns wax more fully and evenly, with reduced tunneling around the wick and improved scent throw.
- 2** Provides a more consistent burn throughout the life of the candle. You get the same burn rate in the first few minutes of lighting the candle as you do hours after the candle is lit and also get a great, consistent burn rate whether you are lighting the candle for the first time or the tenth time.
- 3** Low nickel coupled with Cargill's high manufacturing standards and batch to batch consistency ensures you get the same quality and physical properties in every batch of wax. Because of this, less testing and tweaking of formulations or wicks is necessary between production batches, making it easier and faster to manufacture your candles. You'll get a candle that performs as you designed it to every time.

Low vs. High Nickel Effect on Rate of Consumption

*Patents include US 11,661,566; 11,008,532; 12,043,819; and other global patents.

NatureWax Ultimate

**Match the high performance of paraffin wax blends
with ready to pour, 100% plant-based wax.**

When you start off well, you're bound to end that way. NatureWax Ultimate is a proprietary 100% plant-based candle wax with all the performance you expect from a paraffin wax blend without the need for any of the petroleum-based ingredients. So you get off to a good start and stay that way for the entire life of the candle.

- Same high performance as paraffin wax blends
- 100% plant-based
- Exceptional scent throw
- Specifically formulated for scented container candles

A Wax For Every Maker

NatureWax has waxes specifically formulated to work in scented container candles, pillars, wax melts, tea lights, and religious candles. As one of the largest providers of plant-based waxes in the world, with a wide variety of wax types and physical properties, our R&D team has years of experience in developing industry-leading products. Learn more about our portfolio to find the wax that's perfect for your candle.

NatureWax Soy Wax

Soy wax is a favorite for a reason—easy to use, beautifully versatile, with a long, clean burn and standout scent throw.

NatureWax Palm Wax

Offering impressive stability and a refined finish, palm wax delivers high-quality performance across a broad melting range while also being cost effective.

NatureWax Rapeseed Wax*

With exceptional fragrance retention, impressive scent throw, and extended burn time, rapeseed wax stands out for its balanced performance.

NatureWax Coconut Wax

Coconut wax burns slowly and cleanly, blends effortlessly, and delivers a bright, creamy finish.

*Only available in select regions

Performance and Technical Data

NatureWax features a broad portfolio of high performing, plant-based waxes used by premium candle makers around the world. Through deep technical expertise, we've created one of the largest portfolios of proprietary soy, palm, coconut, rapeseed, and specialty wax blends for a wide range of different candle processes and products.

PRODUCT	RENEWABLE SOURCE*	FORM	APPLICATION	DROP POINT (°F)	MAX COLOR (LOVIBOND 5¼") Y/R
