

Starches, Sweeteners,
Europe

We deliver sustainability for you throughout the chain

Discover how

From the farm...

Regenerative agriculture

We support our farmers in their transition to regenerative agriculture to mitigate climate change, regenerate soil and, improve water conservation.

Transparency & traceability

We know where our ingredients are sourced from, and in many cases, are directly connected to the farmer through our suppliers.

Sustainable sourcing

We enhance farmer livelihood through our extensive training programs. Our sustainability sourced raw materials are independently verified - Farm Sustainability Assessment*.

at our plant...

Local sourcing

We prioritize local sourcing of raw materials for our plants to reduce transportation distance

Certification

We run energy management programs, including ISO50001. This ensures a continuous reduction of energy use and emissions.

Renewable energy

We are adopting renewable energy sources to reduce emissions.

Zero waste

Over 99% of the raw materials that we use are processed. The remaining <1% is converted into biogas.

...to you!

Sustainable fuels

We adopt low carbon fuels to decrease emissions.

Intermodal solutions

We combine different transportation models to reduce emissions and optimize the quantity shipped per order to reduce handling and emissions.

Life cycle assessment

We are developing product life cycle analysis (LCA) data.
